

Weekly COVID-19 Update:

We continue in Phase 1 of our Regathering Guidelines. Hospitalization percentage in our area moved to less than 4% this week. In normal circumstances we might be entertaining in-person worship again, but with the damage to our facility due to the winter weather, we cannot recommence at this time. Stay tuned to future announcements on the timeline for repairs.

We are tracking members that we are aware of that have tested positive:

- 1 death
- Zero active cases

If you have tested positive or know of anyone within our congregation that has tested positive, please notify the church promptly. We will be doing contract tracing and let others know of who might be at risk. Additionally, we would like to support our church family with care.

Above you will see the highlighted area, Area P. This is an exceptionally large area which includes San Antonio. The current statistics as of **March 30, 2021**:

Hospitalizations: 3.48%. Numbers are steady declining.
